Re: Application to the Northern Development Initiative Trust

Please find enclosed our 2010 application for consideration under the NDIT Halls and Recreation Grants of \$ 30,000.

Please note that 2009 was a very difficult and tragic year for our Society.

We were the victims of burglary and theft on two occasions and this set back operations and the condition of the course and club house. Attached is our 2008 and 2009 Financial Statements. 2008 indicates a normal or routine year of operation. Our allocation of \$ 60 000 projected earnings in 2010 is a reasonable expectation. With increased employment from the NDIT, our revenue will increase.

We also experienced a further setback when the water lines did not work as originally designed. Some lines had been vandalized and labor had to be directed to this difficulty. An added drought in the early year prevented the optimum maintenance of the course.

Our President who originally spearheaded the writing of this grant died unexpectedly on December 16, 2009.

From the first meetings in November 2009 to this point, we have rallied to complete this application and have had members contribute substantially to the planned improvements. Please note that our members have completed "contribution commitment" letters so that a substantive proof is shown that we will operate successfully over the next five years.

In two weeks, over \$ 2000 worth of 2010 memberships have been sold so the initiative from the membership is solid and well supported. This Grant from the NDIT will assist the Society in assuring us a sustainable future, plus address our concerns and improve the Golf Course.

Yours truly,

Allen Courtoreille
(President)
