Peace River Regional District Highway Lighting & Signage Installation Canada-BC-UBCM Gas Tax Fund

The Peace River Regional District recently concluded a Two Hundred and Eighty Thousand Dollar joint project with the Ministry of Transportation to install intersection lighting at various highway locations and road directional signage in several remote locations.

The Regional District was able to partner with the Ministry of Transportation to install intersection lights at twelve rural remote highway intersections and fifty-nine directional and location signs in remote and rural areas of the Peace River Regional District. It was the opinion that this project was important to our region for both safety of local residence, the traveling public and the active oil & gas industry, therefore a connection to Gas Tax Fund eligibility criteria was sought. The connection found was to the reduction of gas emissions. This eligibility connection was established based on the times that visiting workers, as well as local residents, bypass turnoffs by many kilometers then have to back-track, short winter daylight hours, as well as the fact that the openness of our land lends to white-outs on our roadways in the winter and the many kilometers of roadways in the region can lend to confusion and disorientation to those in search of isolated work locations.

The Peace River Regional District and the Ministry of Transportation have entered into an agreement allowing the local government assets to be installed on roadway property with the Ministry responsible for the maintenance and operation of the lights.

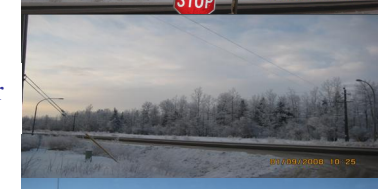

The Peace River Regional District would like to express appreciation to the Federal Government and the BC Government for continuing to provide funds through the Canada-BC-UBCM Gas Tax Fund to assist local governments to meet the challenges that face their regions.

Due to the nature of the project and the fact that funding signs at the many locations would be unnoticed by the public as well as impractical, a framed notice with pictures of the various lights and signs as well as this project notice will be prominently placed in the two Peace River Regional District offices.
